

CCINFOM DATABASE APPLICATION PROPOSAL

Clothing Store Inventory and Sales Management System

Section 1.0 Group Composition

- Agunanne, Henry
- Adriano, Mark Luis
- Encallado, Edlynn Rei
- Manatad, Francinne

Section 2.0 Why is this Database System important to be developed

One cannot deny that relying on Excel to manage inventory, customer data, and sales often becomes unmanageable and prone to errors as the business grows bigger. Hence, having a dedicated database system will centralize these processes and enable real-time tracking, accurate sales recording, and automated reporting. This not only enhances operational efficiency but also provides the analytical tools needed to support informed, data-driven business decisions—capabilities that Excel alone cannot reliably offer.

Section 3.0 Records Management

The proposed database system will maintain four core entities: Product, Customer, Sales Representative, and Branch Records. Each of these components plays a vital role in the store's operations and will be handled through dedicated record management modules. Detailed descriptions of each record are presented in the table below.

Records	Fields	Assigned to
Product Record Management	- product_id - product_name - size - color - category - quantity_in_stock - unit_price - discontinued Including viewing a product record and the list of customers who purchased it	Henry Agunanne
Customer Record Management	- <i>customer_id</i> - <i>first_name</i> - <i>last_name</i> - <i>email</i> - <i>gender</i> - <i>date_registered</i> Including viewing a customer and the list of products they	Manatad, Francinne Kaye

	purchased	
Sales Representative Record Management	- <i>sales_rep_id</i> - <i>name</i> - <i>branch_code</i> - <i>email</i> - <i>hire_date</i> - <i>active_status</i> Including viewing a sales representative and their completed sales	Encallado Edlynn Rei
Branch Record Management	- <i>branch_code</i> - <i>branch_name</i> - <i>location</i> - <i>contact_number</i> Including viewing a branch and the list of active sales representatives	Manatad Francinne

Section 4.0 Transactions

Transaction 1: Selling Clothing Items

Assigned to: Encallado Edlynn Rei

Operations:

- Retrieve information and validate status if the sale is from a member
- Display available products by size and category
- Record the sale (type of payment, member information, sales rep, total amount, date)
- Record each item sold (product, quantity, unit price)
- Update stock quantity

Transaction 2: Restocking Products

Assigned to: Adriano, Mark Luis

Operations:

- Choose supplier
- Select products to restock
- Input quantity and cost
- Record restocking entry
- Update stock levels

Transaction 3: Processing a Return

Assigned to: Agunanne, Henry

Operations:

- Select past sale to return from
- Select items and quantities being returned
- Add return record and reason
- Update product stock (increase quantity)
- Generate return receipt

Transaction 4: Transferring Stock Between Branches

Assigned to: Manatad, Francinne

Operations:

- Select source and destination branches
- Select products and quantity to transfer
- Deduct from source branch inventory
- Add to destination branch inventory
- Log stock transfer with date and reason

Section 5.0 Reports to be Generated

Report	Description	Assigned to
Monthly Sales Report	Total sales amount and quantity sold per day, grouped by product category, for a selected month and year	Henry Agunanne
Sales per Sales Representative Report	Total sales amount per sales rep, grouped by branch, for a selected month	Adriano Mark Luis
Product Performance Report	Total quantity sold and revenue per product, for a selected quarter, including average price sold	Encallado Edlynn Rei
Revenue per Branch Report	Total revenue generated per branch for a selected month and year	Manatad Francinne
